*...for the safe disposal, recycling, or reuse
of household chemicals...*

**REPAIRS
DON'T SPOIL IT!**

What are household hazardous materials?

A product label which has any of these words listed on it, **Warning, Caution, Poison, Danger**, is a product which has ingredients that may have one or more of the following hazardous characteristics: corrosive, reactive, toxic, flammable, or explosive.

Common household hazardous materials accepted:

Adhesives	Arts and Crafts Materials
Car Batteries	Brake Fluid
Cleaning Products	Photo Chemicals
Disinfectants	Gasoline
Herbicides	Insecticides
Kerosene	Motor Oil
Pool Chemicals	Wood Preservatives
Paint	Solvents

1 - 3 pound propane cylinders

By appointment only!

*Please, for your safety and ours,
no unattended dropoffs!*

**Mobile pickup is
available to homebound residents.**

Usable Products Available:

Re-mixed latex paint is available for exterior building painting.

Also, usable products such as spray paint, stains, and varnishes are available.

Distribution of products is *open to the public*. Call to check on time availability.

What Can I Do With Unwanted Household Chemicals?

The Johnson County Hazardous Materials Collection Facility provides an alternative to trash disposal of household hazardous materials. Other options are listed below:

Latex paint can go in the trash, but if it is still liquid, be sure to first solidify it with kitty litter or sawdust. We recycle good latex paint.

Used motor oil can be recycled at many Jiffy Lubes, Valvoline Instant Oil Change stores, and NAPA Auto Parts. Please call store to confirm before you go.

Antifreeze, as well as many other household products, can be disposed of in the sanitary sewers (do not dispose of in a septic tank system). Call for information, if needed.

Household alkaline batteries can be disposed of in your household trash.

Empty containers go in your household trash.

Solidified materials such as adhesives, caulk tubes, roof cement, glues and crack sealer can go in your household trash.
