

# RECYCLING WHERE YOU LIVE

A woman with blonde hair, wearing a blue long-sleeved top and white pants, is smiling and holding the green lid of a recycling bin. A young boy in a yellow and blue striped polo shirt is standing next to a blue recycling bin, holding a clear plastic cup. The bin has a recycling symbol and the text 'RECYCLING SERVICE' on it. The scene is outdoors on a sidewalk next to a brick house.

Come home to effective residential recycling.

# RECYCLING WHERE YOU LIVE

## Come home to convenient residential recycling

We make it *easy* and *cost-effective* to recycle at home. We work hard on our end to make it easy for you.

Because we have invested in state-of-the-art technology, you can put all of your recyclable materials into one container. Known as single-stream, single-sort or one-sort, this process has been shown to increase diversion rates dramatically in cities and towns across the country. The carts hold plenty of recyclables yet are easy to wheel to the curb.

Our automated trucks pick up the materials throughout the neighborhood and deliver them to the materials recovery facility (MRF). There, they will be processed by sorting technologies ranging from magnets to screens to optical sorters that can identify and separate different types of paper, metals and plastics.

**SINGLE-STREAM  
RESIDENTIAL  
RECYCLING**

It's smart to work with an expert. We have more than 20 years of experience developing cost-effective, user-friendly *recycling solutions* to minimize the amount of sorting our customers have to do. We have a nationwide network of recycling facilities and work with more than 100 mills and manufacturers worldwide that process your recyclables into new products like newspaper, cardboard boxes, glass and plastic bottles, tissue, paper towels and metal cans.

In all, we recycle more than 3 million tons of material each year—that's nearly 200 pounds per second. That's the power of recycling with Republic Services.

*To help boost recycling participation and diversion rates, we worked with a municipality of more than 22,000 residents to transform an existing recycling program. In just one year, we were able to increase recycling by approximately 80 tons per month. Participation is also up, with more than 85 percent of households involved.*

It's good for our planet and for our communities. And it all starts with you.
