

LEAWOOD PARKS & RECREATION POLICIES AND PROCEDURES

SECTION ONE: OPERATIONS

SECTION:	500 - Sports	DATE:	5-19-2007
POLICY:	Heat Policy - Youth Sports	NUMBER	500.03
LAST REVISION:	June 14, 2016		

I) General Policy

This policy applies to all youth sports leagues that take place in the City of Leawoods parks.

II) Objectives

To insure the safety of all participants, coaches, officials, volunteers, and parents involved in the youth sports programs.

III) Procedures

The Sports Supervisor or other assigned staff shall monitor the heat index each game day. The heat index will be determined by referencing the National Weather Service website at www.weather.gov prior to game time. If water jugs are necessary they will be taken to the fields on game days.

IV) Policies

1. (Yellow Zone) Heat index of 90-96 degrees. In this range coaches are encouraged to take extra steps to protect their players by keeping them hydrated and keeping them seated out of the sun when they are not in the field of play.

2. (Orange Zone) Heat index of 97-104 degrees. Coaches still take same measures as in the yellow zone and Recreation Division will provide water coolers with ice and water at both fields on game days. Coaches need to keep their players well hydrated and out of the sun as much as possible at practices.

3. (Red Zone) Heat Index of 105-110. Any on going or scheduled games will be reduced by 15 minutes. Coaches should shorten the practice time by 15 minutes. All actions taken in orange and yellow zones will also be required.

4. (Black Zone) Heat Index of 111 or higher. Games and practices will be cancelled until the heat index drops below 111. Notification will be given on the rain out line phone. (913) 982-2433 #1.

V) Enforcement

The fields will be monitored and maintained by a field supervisor or sports supervisor to ensure the heat policy is enforced during games. The above policy

is merely guideline and it is the responsibility of parents to make the ultimate decision as to the participation of their child in Leawood Parks & Recreation programs when heat may be a factor, taking into consideration the age and physical condition of their child. Parents also have the ultimate responsibility to inform their child about the dangers of heat and need for protection, including sunscreen, proper clothing, and proper hydration.
