

LEAWOOD TRAIL PERMANENT RESTROOMS

The Leawood trails are a shining example of the opportunities to walk, run, bike or rollerblade for better physical or mental health, or to simply enjoy the beauty of nature.

The Tomahawk Creek Trail connects users from Roe to City Park. One of the most heavily used sections is between City Park (106th and Lee Boulevard) and Tomahawk Park (119th Street between Mission Road and the parkway). Since the trail was constructed in the early 1980's, the only available restrooms have been portable, non-flush, and without sinks or climate control.

The Leawood Foundation is working with the Parks, Recreation and Cultural Arts Department to change this by raising funds for a men's and women's flush, seasonably controlled, attractive restroom adjacent to the north lake. With thousands of trail users, during all seasons, this is a much needed amenity that will be located about half way between the two parks.

The estimated cost for site work, utilities and construction of the restroom is estimated at \$275,000. The City is generously providing

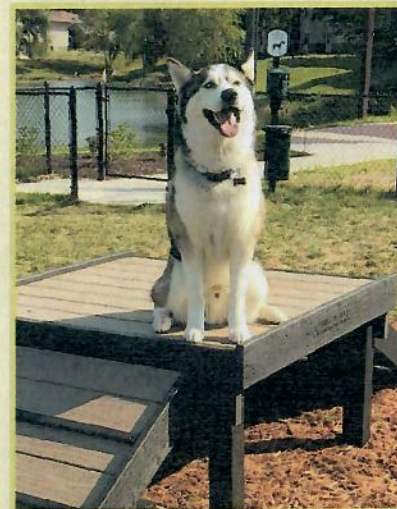

\$100,000 towards the project to encourage other donations, large or small, to bring the project to fruition.

With your important donation, the project is planned to commence in the spring of 2021 and be completed mid-year.

The heavily used agility course that was installed six years ago has been replaced with more substantially constructed, enjoyable stations for the dogs.

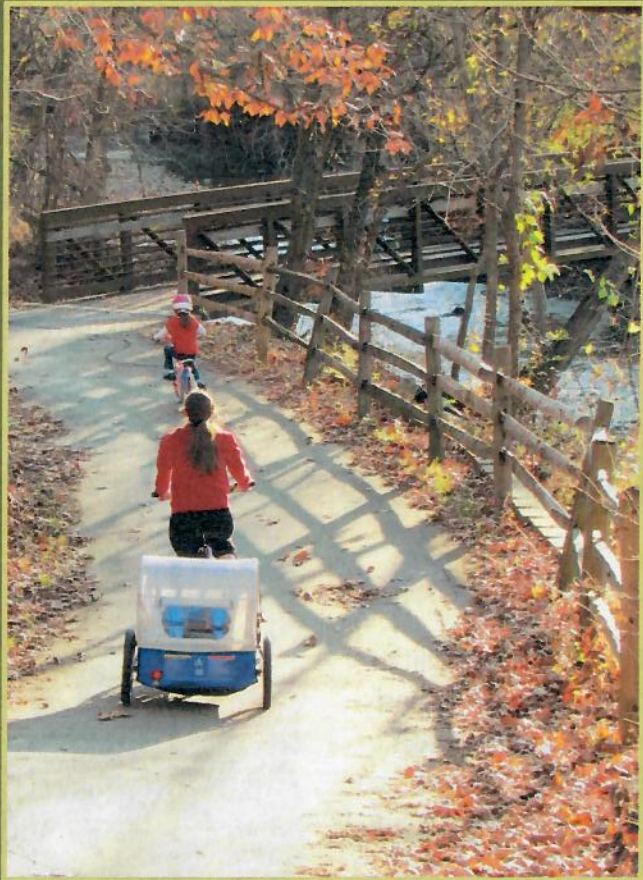

Dog lovers will enjoy an improved way to interact with their pets now that the new pieces have been installed.

Thank you to all the donors who made this project possible.

LEAWOOD DOG PARK ENHANCEMENT

The Foundation is pleased to report that due to numerous donations, this project is fully funded!
